

New South Technologies

Governance-First Modernization for Federal & State Government

Reston, Virginia · Washington, D.C. Metro · newsouthtechnologies.com

Core Competencies

- **Legacy Modernization** — incremental, strangler-fig migration off mainframes to FedRAMP-aligned cloud, with no big-bang cutover or mission disruption.
- **Governed Agility** — DevSecOps with controls-as-code and continuous authorization (cATO); compliance embedded in the pipeline with zero unplanned downtime.
- **Responsible AI & Data Governance** — explainability, bias mitigation, monitoring, and data governance grounded in the NIST AI RMF; ready for OMB M-26-04 unbiased-LLM procurement.
- **Professional Certification Training** — PMP, SAFe, Lean Six Sigma, CISA/CISM, ITIL, and AI leadership, delivered by practitioners.

Why New South — Evidence, Not Adjectives

- **Evidence-based delivery.** Every engagement produces control-to-requirement traceability, a compliance evidence pack (NIST SP 800-53 / FedRAMP), an immutable audit log, and plain-language decision records an Inspector General can follow.
- **Governance-first, audit-ready by design** — compliance is a property of the delivery pipeline, not a downstream scramble.
- **Cleared practitioners** holding active Secret and TS/SCI clearances.

Frameworks & Standards

FedRAMP-aligned · NIST SP 800-53 · NIST AI RMF · CMMC 2.0 · Section 508 / WCAG 2.1 AA · OMB M-26-04

Certifications & Clearances

PMP · SAFe (SPC) · AWS GovCloud
Active clearances: Secret, TS/SCI
